SUSTAINABLE
DEVELOPMENT **GOALS**
17 GOALS TO TRANSFORM OUR WORLD

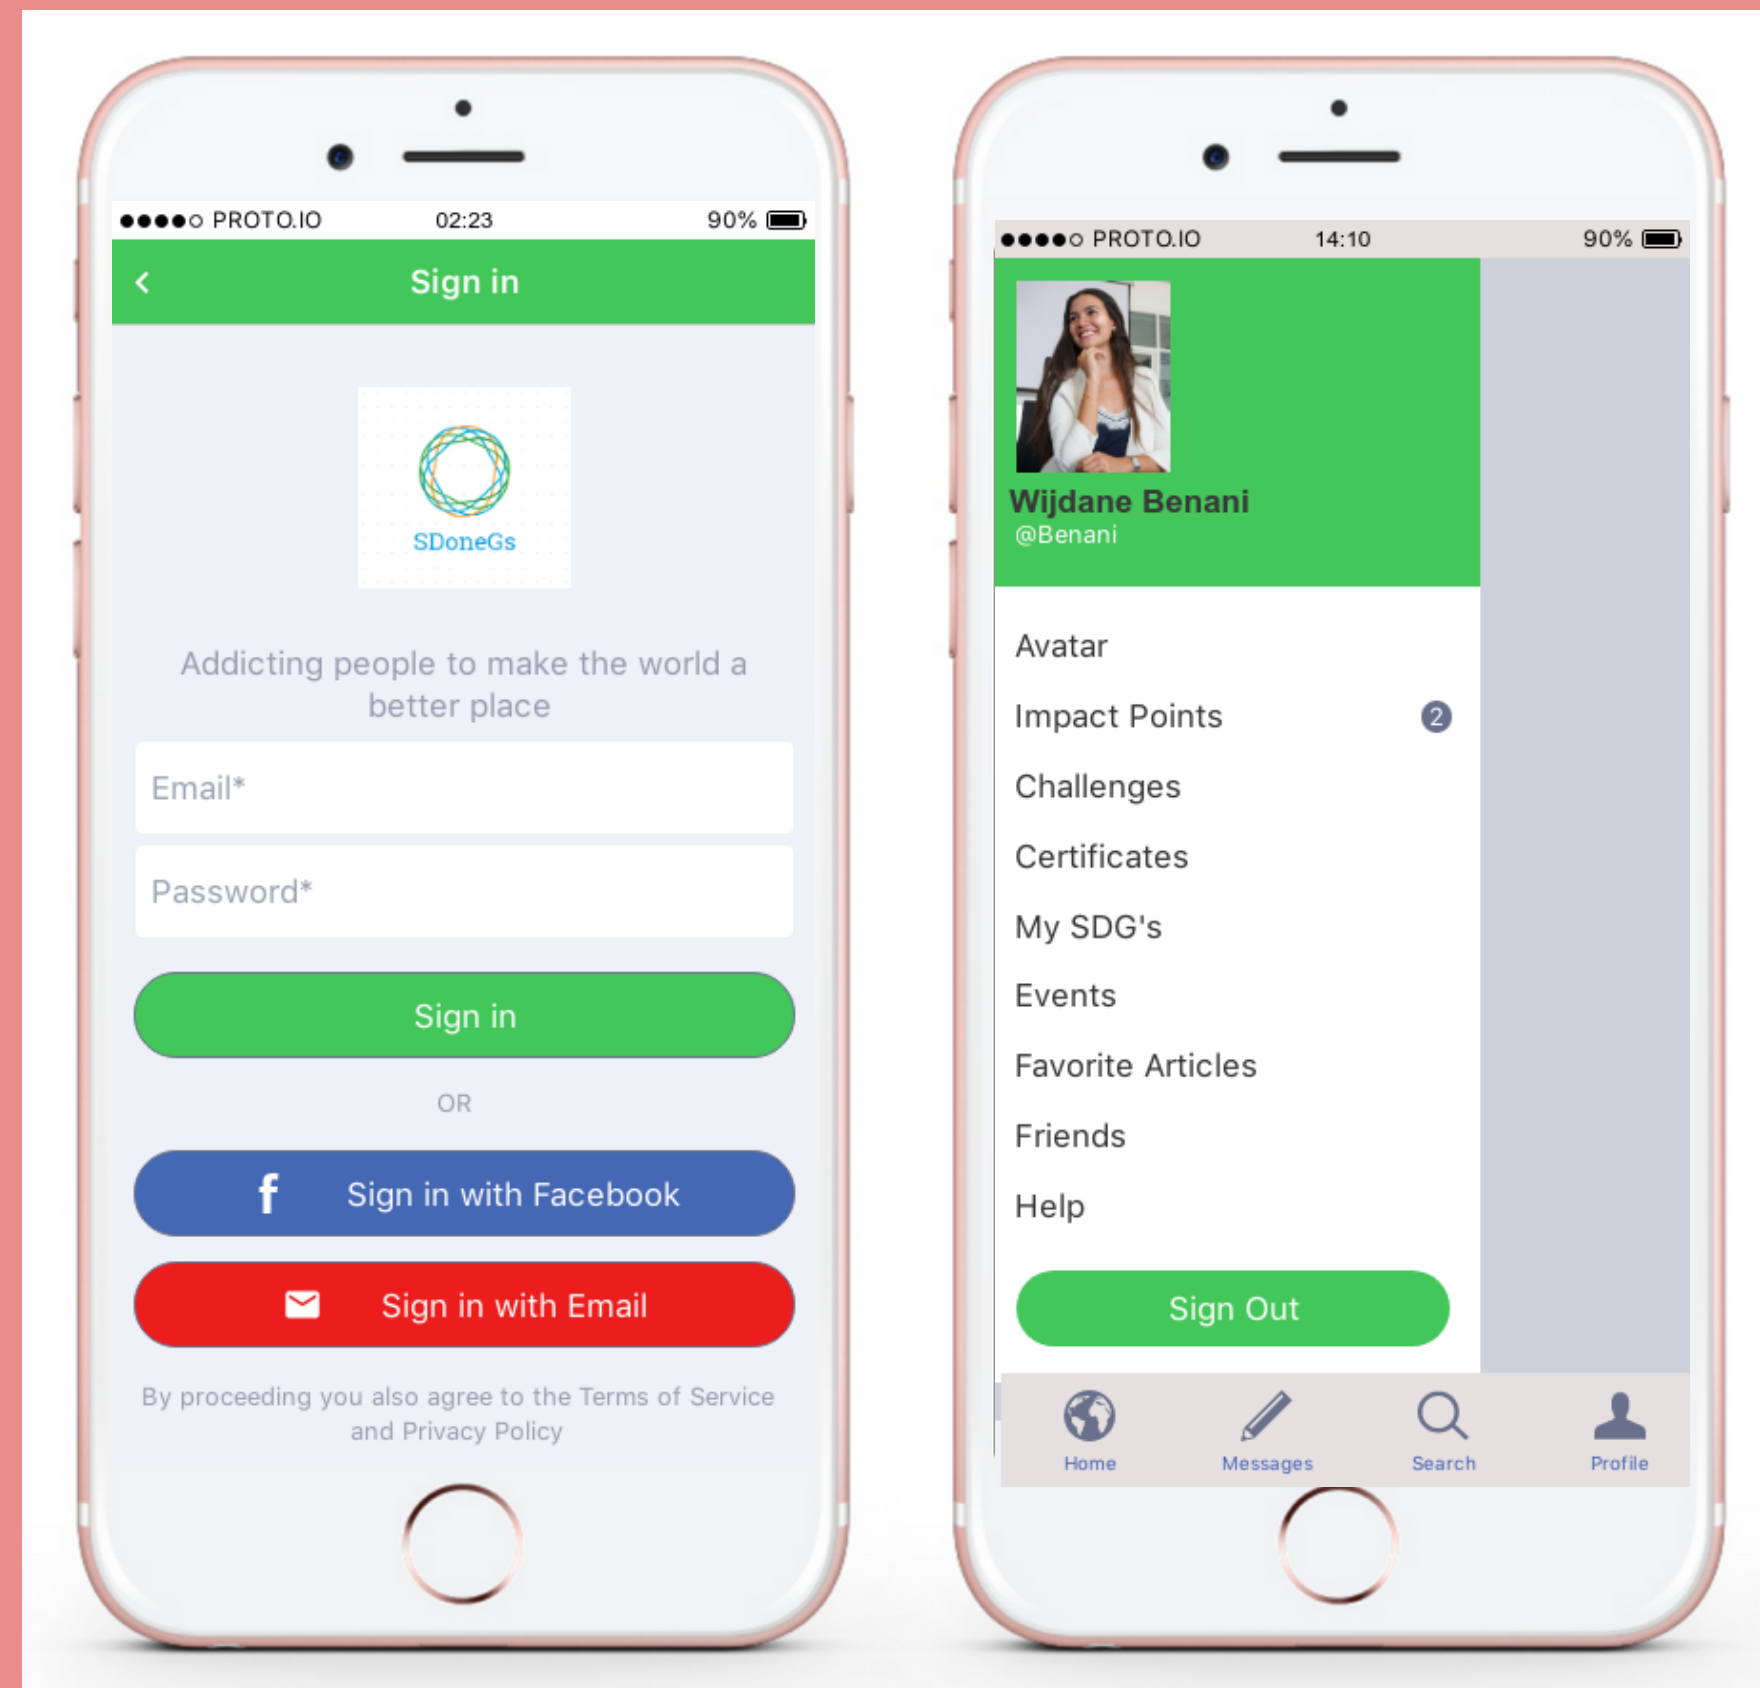

HOW CAN WE BUILD AWARENESS ABOUT THE 2030 AGENDA ?

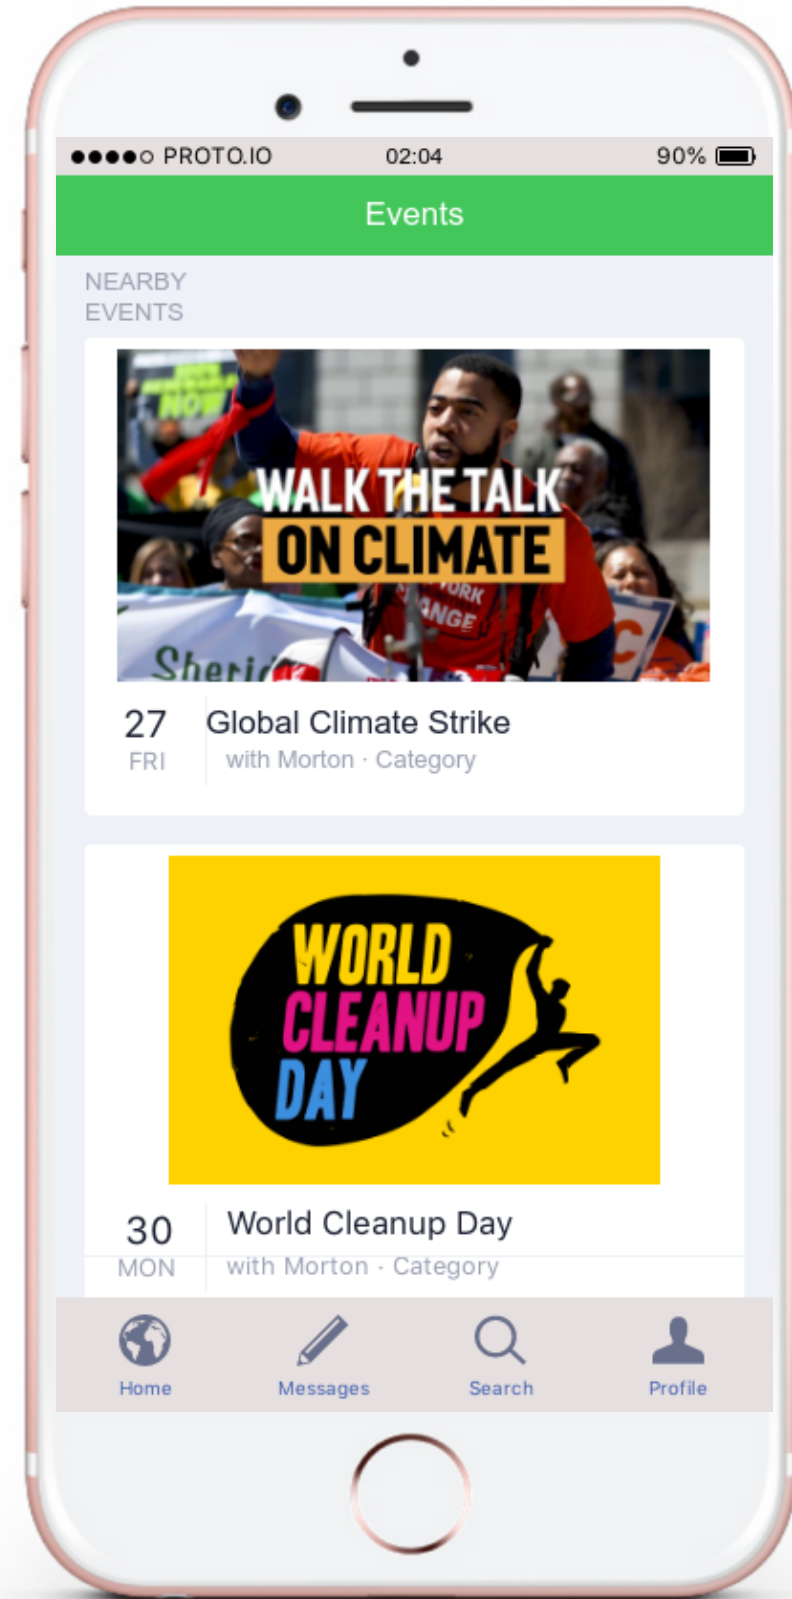

The future belongs to technology, specifically mobile technology and apps. So why not develop a mobile app that educate users about the importance of the sustainable development goals, raises awarness and awards them for taking action and impacting others.

That's what we tried
to do, our app is
developed to
engage citizens
all around the world
to get the global
goals **DONE** by
2030.

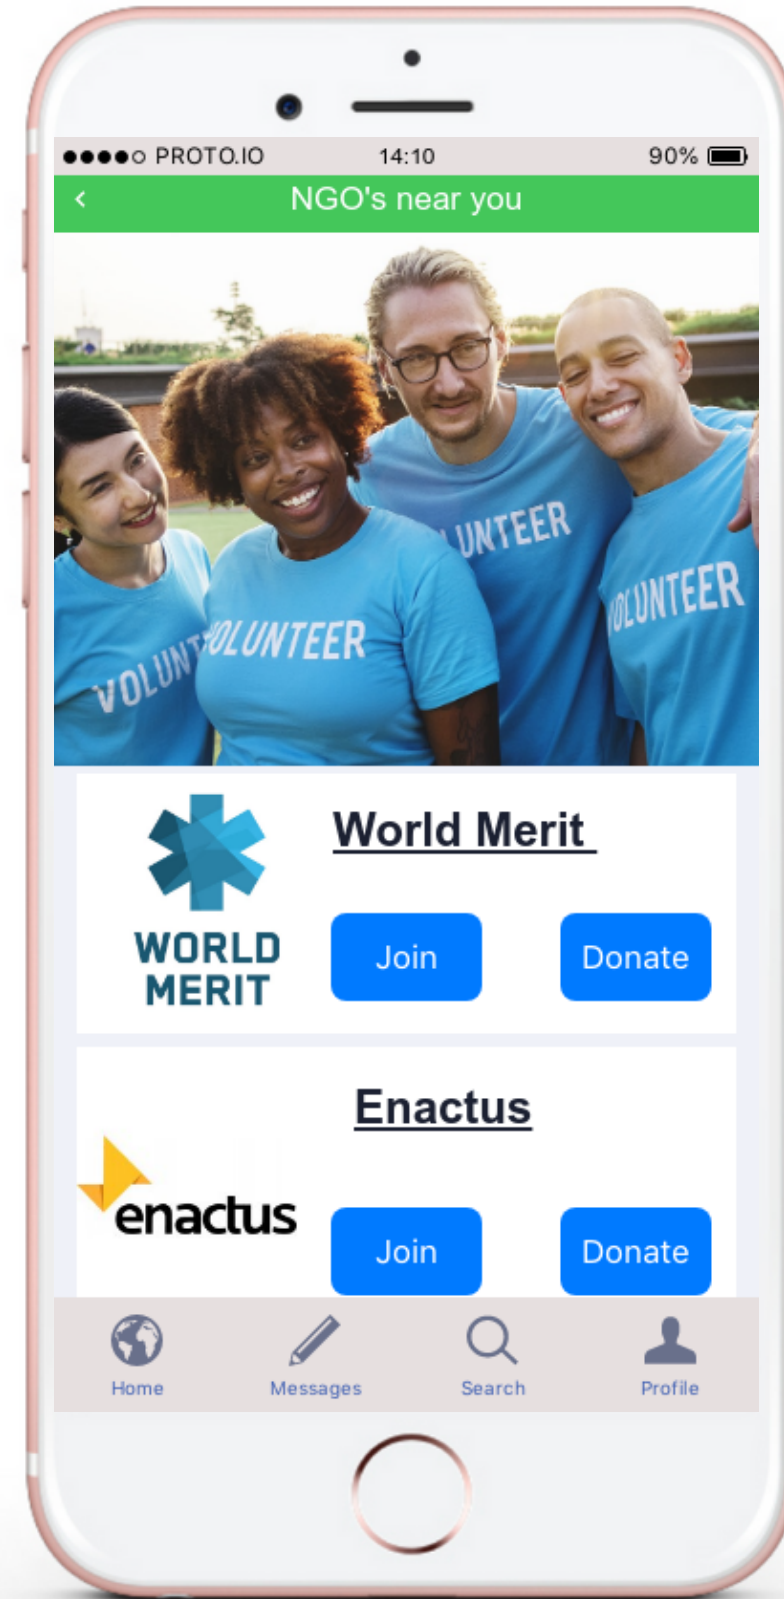

SIGN IN

YOUR
PROFILE

EVENTS NEAR YOU

NGO'S YOU CAN JOIN

For people who want to be involved in their community but don't know how to do it, now they can either **join events** near them or be a part of their nearest **NGO** .

CERTIFICATE OF ACHIEVEMENT

is hereby awarded to

JIMMY E. REDMONT

for impacting people and raising awareness
on the importance of SDGs.

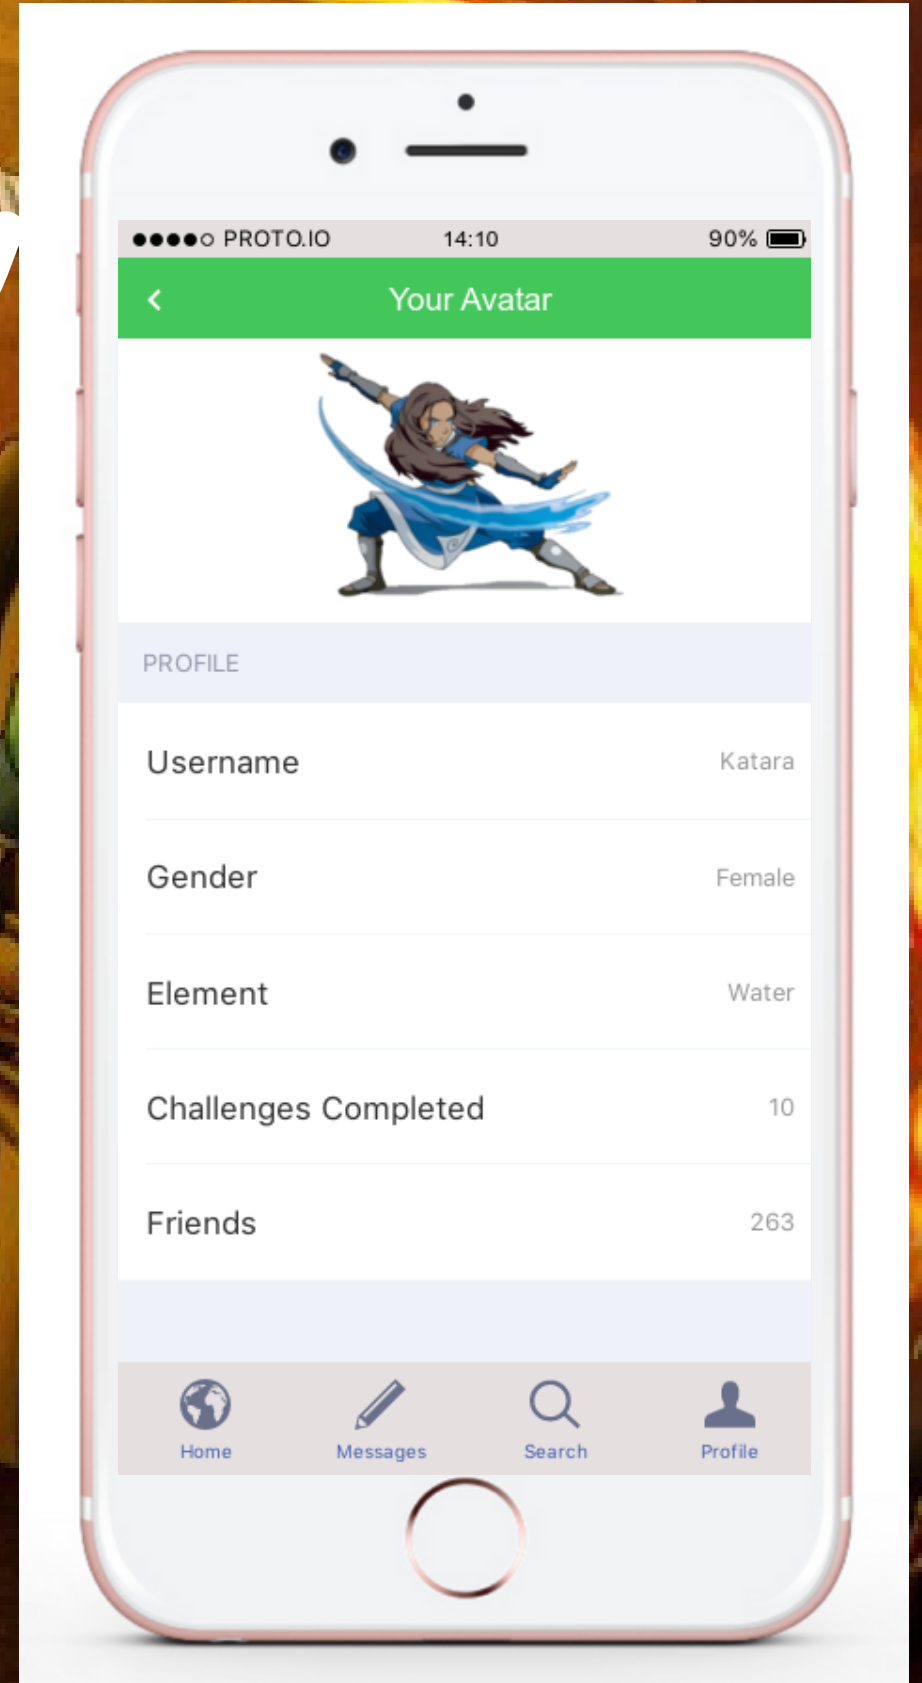

ADORA MONTMINY
NASA Ambassador

WALTER WILKINS
UNICEF Goodwill Ambassador

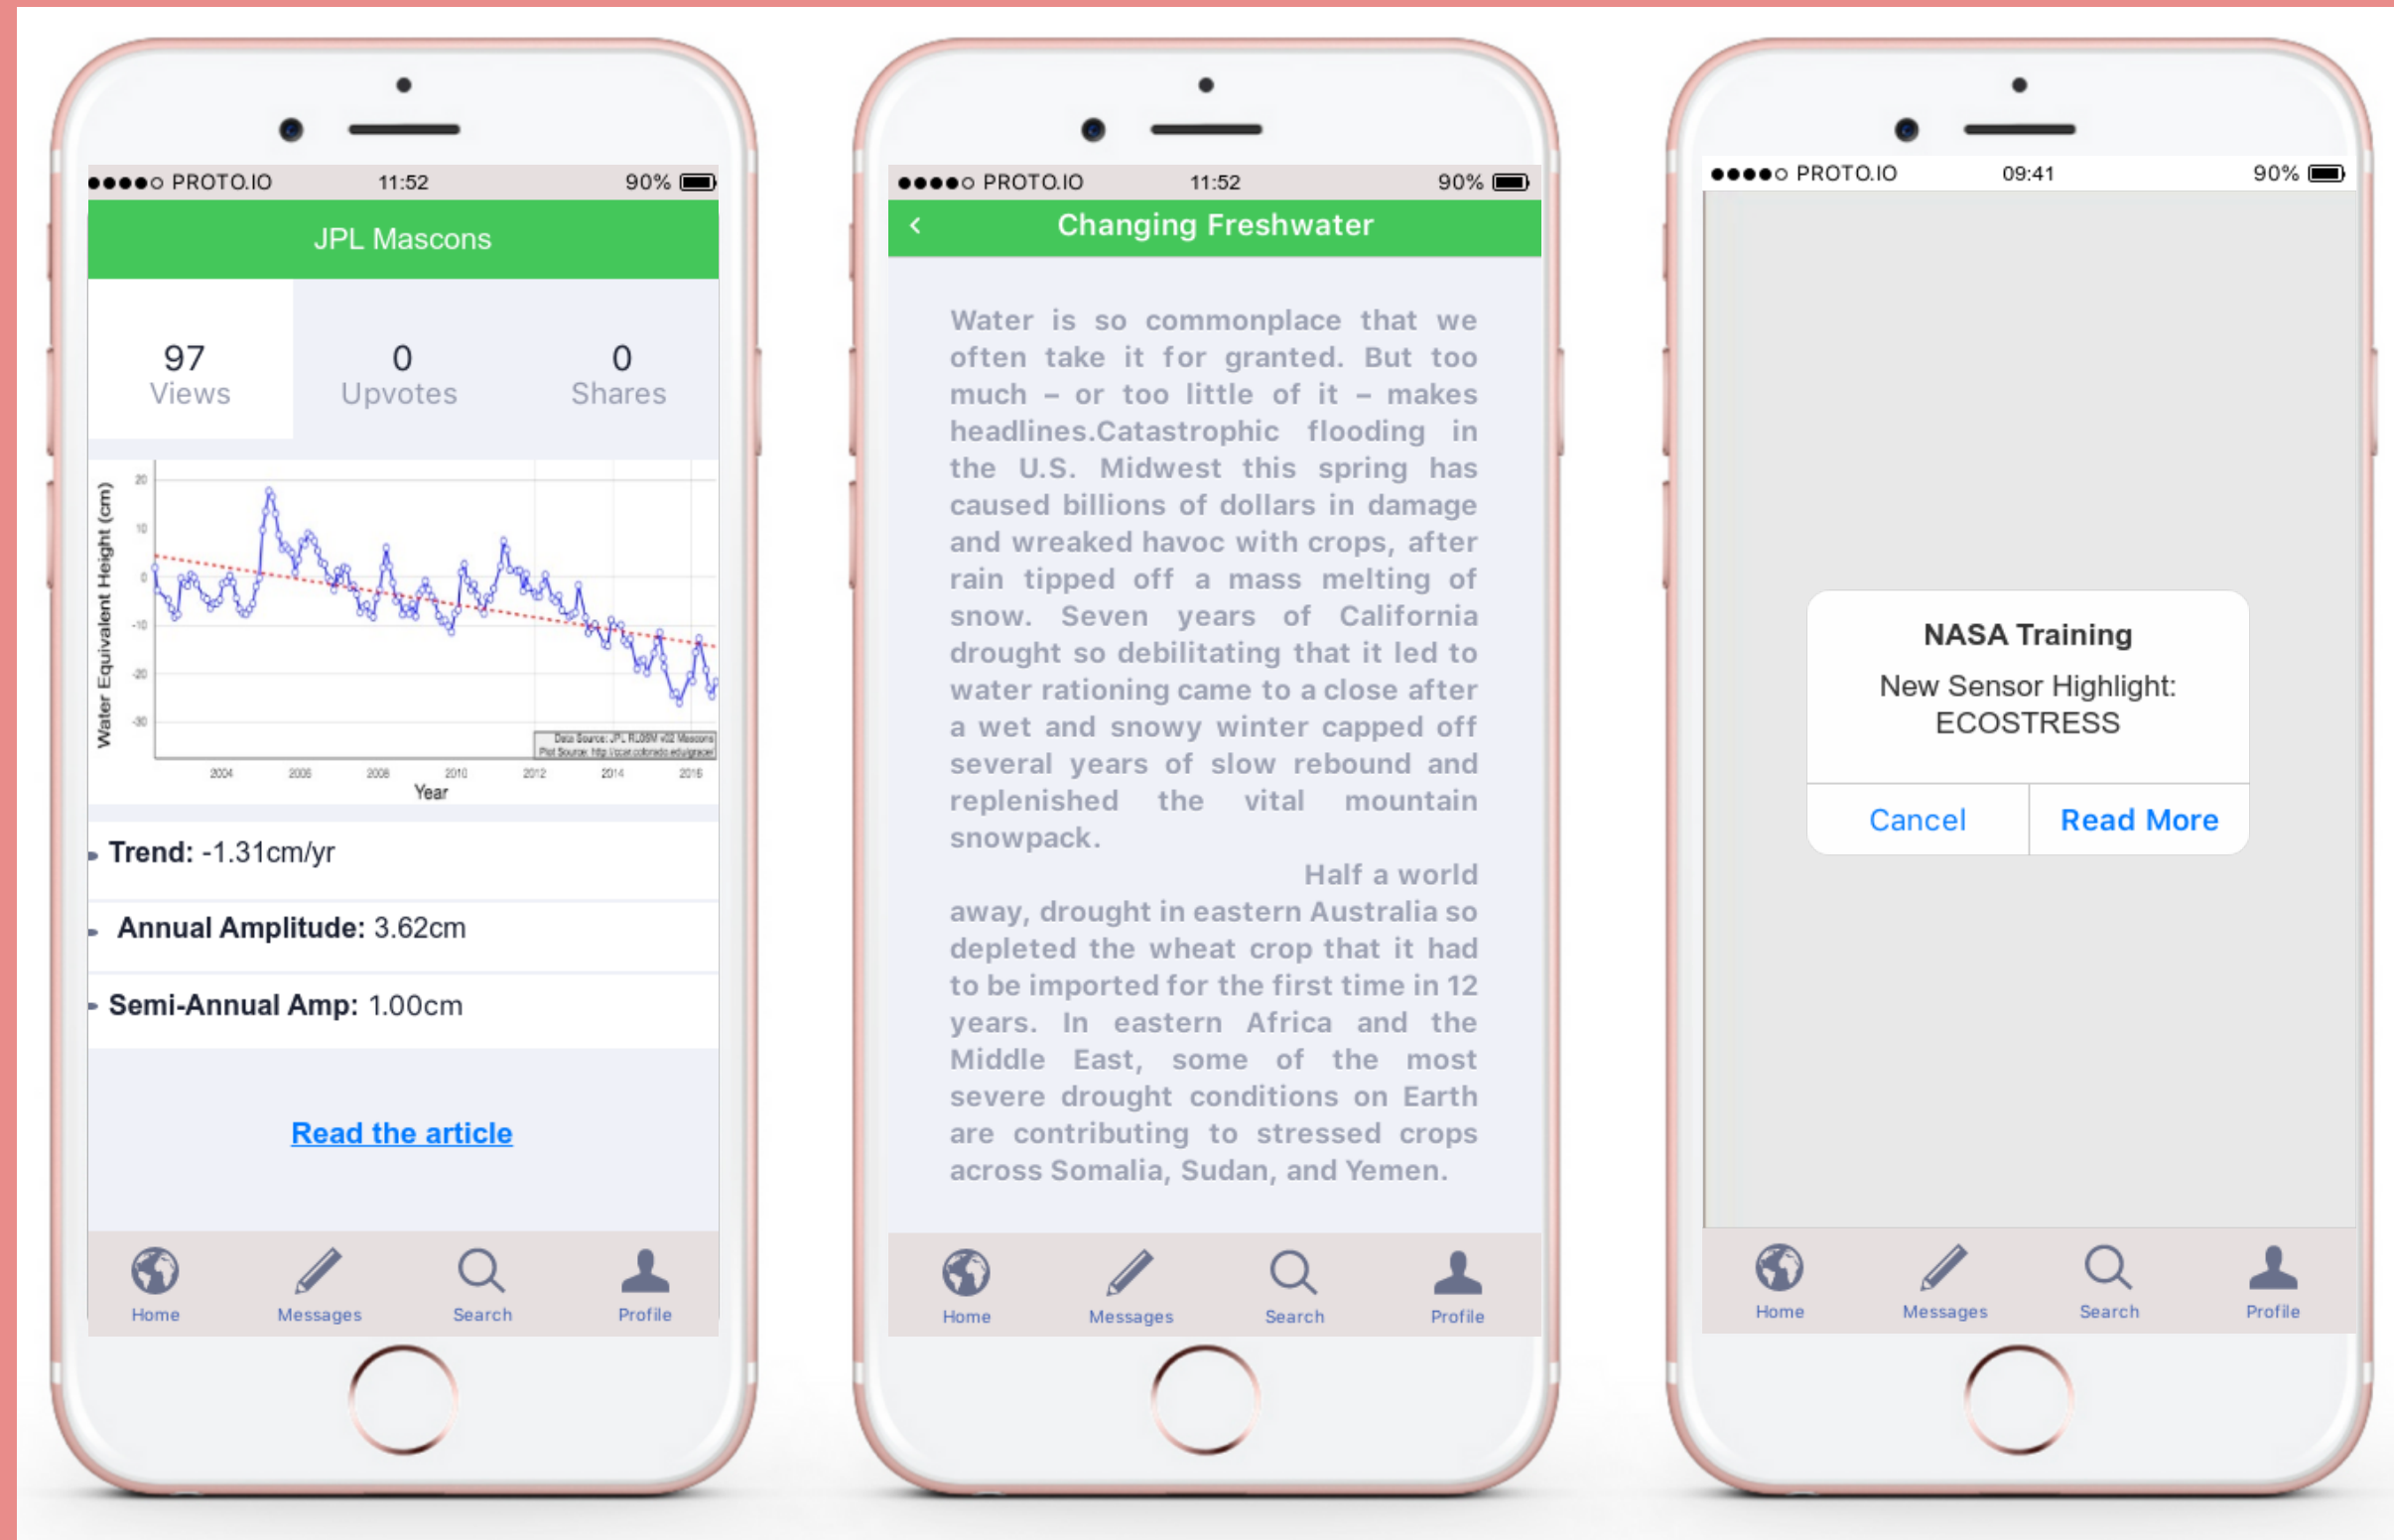

To keep users motivated
we tried to install a
reward system, more
impact, means more
points and eventually a
**Certificate of
Achievement.**

And for the fun part, the users can get an avatar based on their favorite element to complete the monthly challenges proposed by the app, pretty cool, right!

HOW DID WE USE THE NASA DATA ?

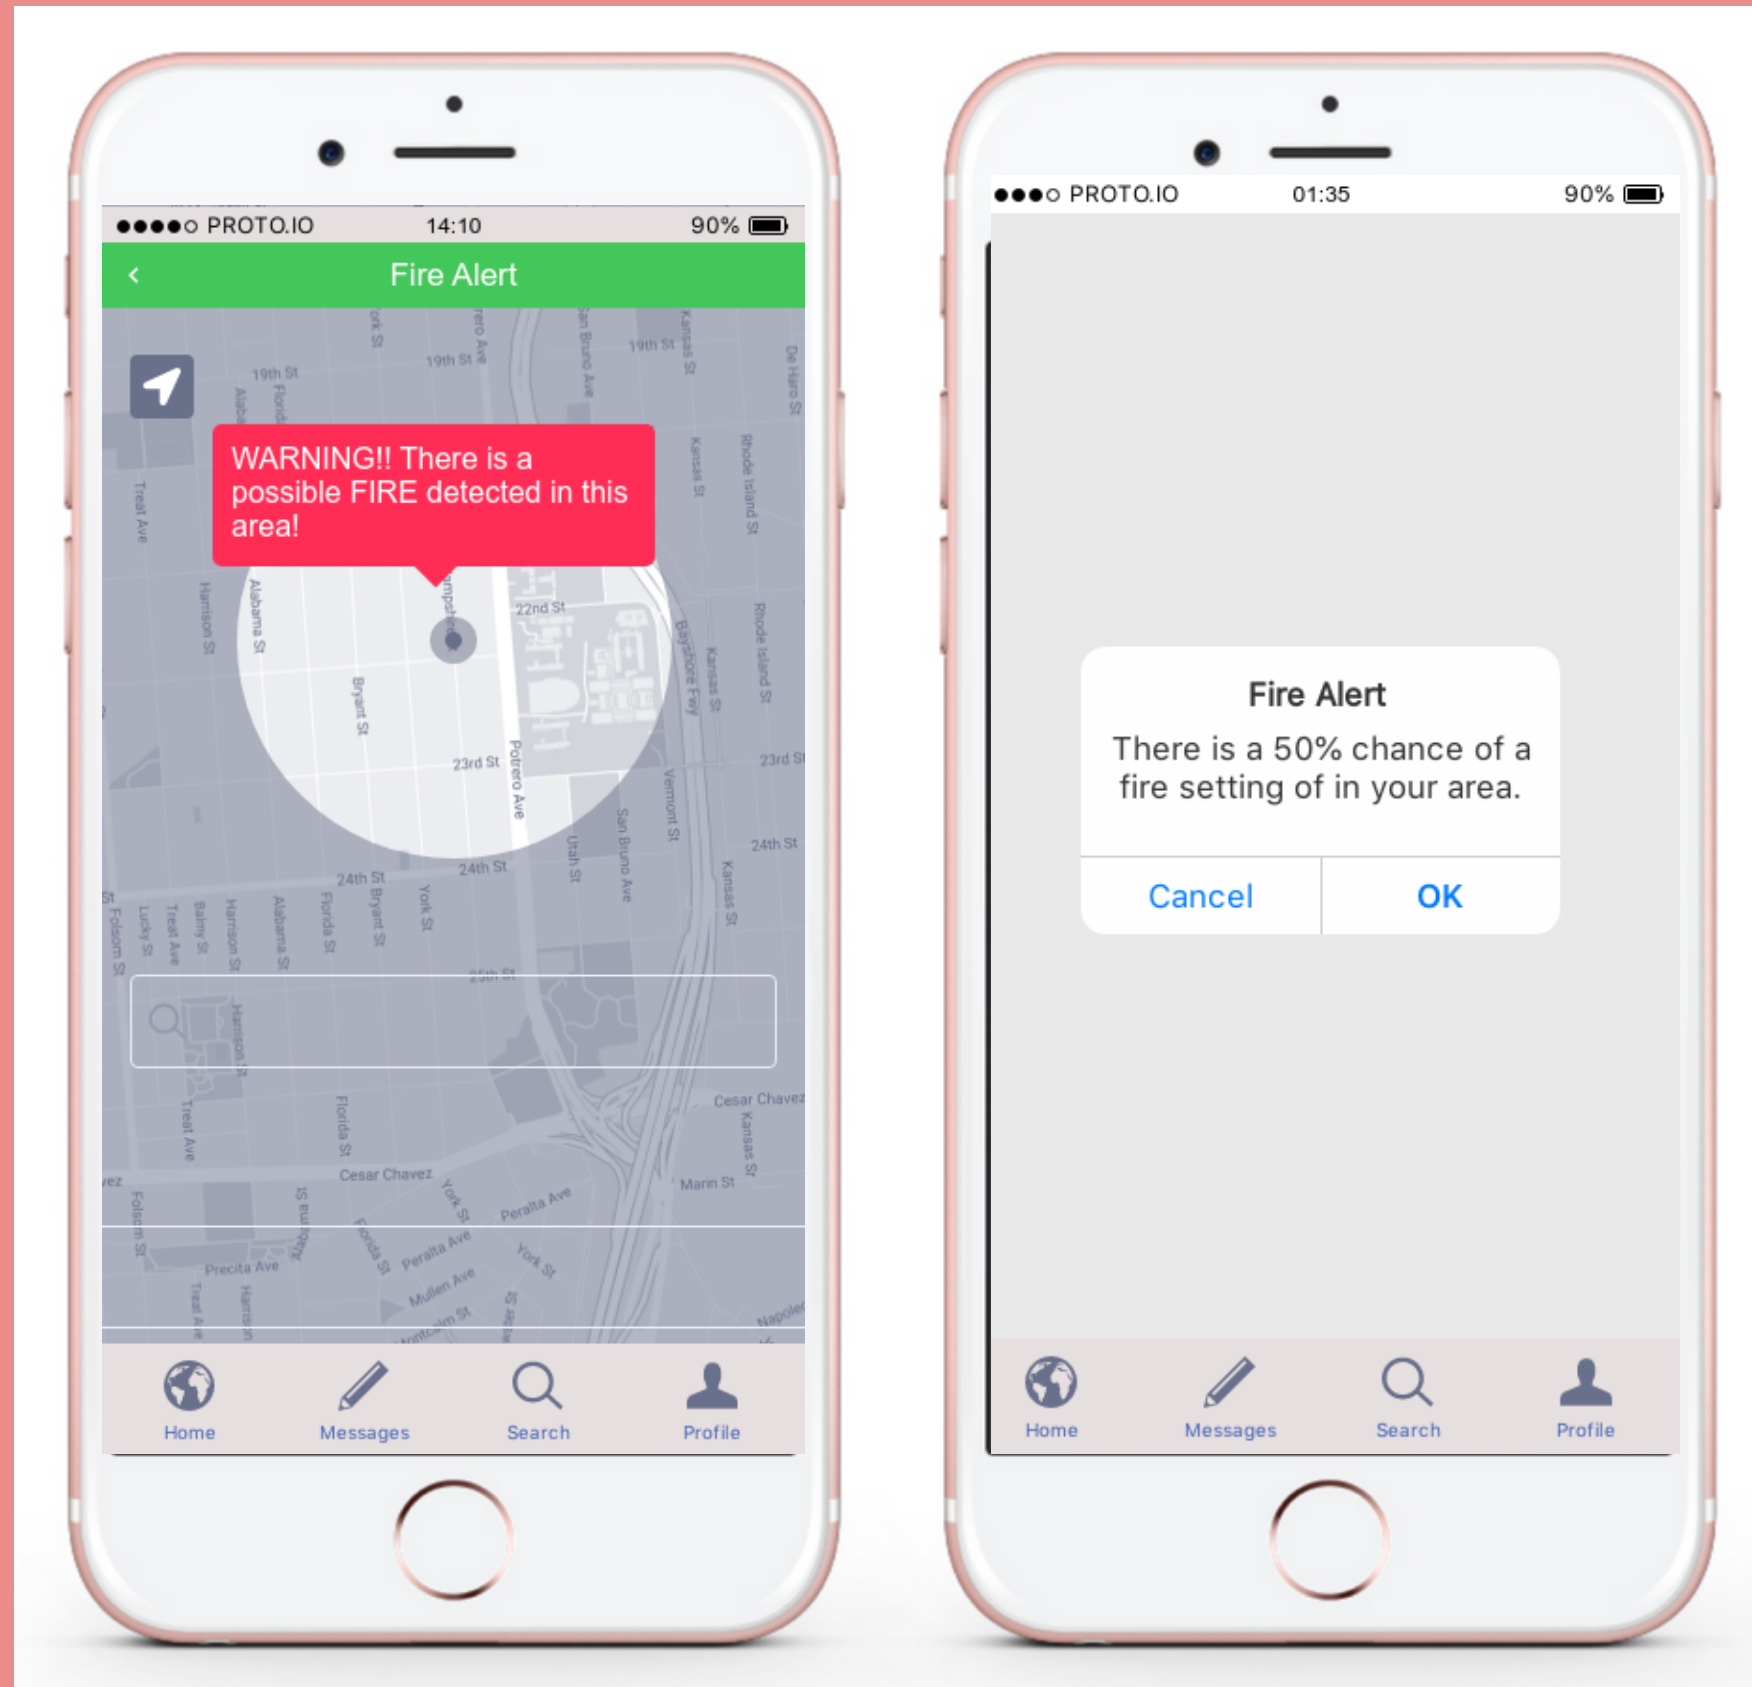

Using the user's position, the app will send the latest **NASA** articles and news simplified, as well as notifications whenever **NASA** is offering a training in your area .

HOW DID WE USE THE NASA DATA ?

THE FIRE AREA

FIRE ALERT
NOTIFICATION

We set up an algorithm that will send users notifications for fire prevention, you can know more about how we did it reading the technical file on [GitHub](#) .
